Agile Project Management, Product Management, Stakeholder Management, Leading Workshops

summary

I'm a passionate frontend developer with 6+ years of experience in development and agile team leadership.

I balance pragmatism with attention to detail and writing clean and future proof code.

I like to take responsibility and leaving my professional comfort zone. I care about my work environment and smart design.

experience

2020 - Today **Web Developer & Product Owner**
elvah GmbH | elvah.de

- leading a diverse, cross-functional team of 10-12 people for one of germany's fastest growing mobility startups
- created landing pages, [registration flow](#) and account management
- actively leading and mentoring the web developers of my team

- doubled conversion rate by updating website and registration flow
- Improved elvah's search engine visibility by over 300% by building a [glossary](#)
- created a shared component library for elvah's web projects
- Stack: Nuxt 2&3, Vue, Typescript, Anime.js

2016 - 2019 **Software Developer**
kreait GmbH agency

- led a product team extending a company CI and website
- developed a SaaS Slack bot for supporting agile teams with their stand-ups that was used by over 400 companies
- designed and developed a microservices architecture for the Slack bot
- took part in the development of various apps and services. From small MVPs, timeframed to prove or unprove a business hypothesis in one month, to large scale microservice architectures with hundreds of thousands of users
- had the opportunity to work with brands like UEFA, Sport1, Melitta, iFolor and Positec
- Stack: Nuxt, Vue, Typescript, Kotlin, Java, Spring, AWS

2018 - Today **Software Developer / Designer**
Freelance

- advised [Peter Lenné School](#) in updating their web presence
- created a portfolio website for the artist [Dominik Galleya](#)
- developed UX concepts for various artist and built small business pages
